Wheat allocation and biomass against fava biomass, wheat/ fava intercrop
Per pot, n = 10 per panel. Line = pooled fit with 95% CI; filled = inoculated, open = sterile.
Control (80% FC)
Moderate (60% FC)
Severe (40% FC)
slope p = 0.951 (pooled)
slope p = 0.960 (adj. for Inoc)
slope p = 0.130 (pooled)
slope p = 0.132 (adj. for Inoc)
slope p = 0.255 (pooled)
slope p = 0.308 (adj. for Inoc)
slope p = 0.774 (pooled)
slope p = 0.842 (adj. for Inoc)
slope p = 0.005 (pooled)
slope p = 0.005 (adj. for Inoc)
slope p = 0.218 (pooled)
slope p = 0.230 (adj. for Inoc)
